When: Applicators can receive CEU credits through this online workshop available from **November 5th, 2025 - January 31st, 2026.**

Where: Online, please visit **starting November 5th** and register at: <https://nmsuondemand.nmsu.edu>

Fees: \$50 flat registration fee per person. This fee allows participants to earn all the CEU's they will need for the year. Companies or groups that need to register 5 or more employees or need an invoice, please contact Dr. Phillip Lujan or Dr. Srijana Dura (contact information, bottom right side of flyer).

Website details: This fully online training has **two separate sections**, one for individuals needing **pre-license training** and the other for individuals needing **CEU's** to maintain their pesticide applicators license.

PRE-LICENSE TRAINING: These series of presentations are for those who are **not already licensed** and can learn all about New Mexico's pesticide rules and regulations and material which will help in preparation for the pesticide licensing exam. At the end of each module (pre-recorded presentation) will be a 5 question multiple choice quiz ,you must first watch the video before the quiz is accessible. You will need to pass this quiz with 100% accuracy.

LICENSED (CEU) TRAINING: These series of presentations are for those that **already have their license** and need CEU's. This year for pesticide license renewals, our New Mexico State University Extension and Research Specialists will be recording a series of 1 hour presentations (modules) worth 1 CEU/mini-badge per presentation. Each pesticide applicator will be able to build their own program to fit their license requirements and topic interests.

Public applicators will need to listen to 4 presentations to fulfill their 4 CEU NMDA requirement. Private applicators will need to listen to 5 presentations to fulfill their 5 CEU NMDA requirement. At the end of each module (pre-recorded presentation) will be a 5 question multiple choice quiz. You must first watch the video before the quiz is accessible. You will need to pass this quiz with 100% accuracy to earn a CEU/mini-badge. *Once your CEU requirement (based on your license type) is earned, you will automatically earn a badge of completion and NMDA will be sent the badge of completion and update your CEU's automatically.* **Direct link for CEU training registration (click here):** [NM Pesticide Applicator CEU Training - Pesticide Safety Education Program \(nmsu.edu\)](#)

If you are an individual with a disability who is in need of an auxiliary aid or service to participate, please contact Phillip Lujan in advance at (575) 646-1822 or pl11@nmsu.edu
