3229 Rodeo Road

Large and small acreage owners are welcome

Join us for a hands-on workshop designed for all types of landowners interested in restoring and improving their land. Whether you manage a small property or large acreage, this workshop will equip you with practical strategies to reduce wind and water erosion, enhance soil health, and create thriving habitats for wildlife and native pollinators. Learn how to become a better steward of your land while contributing to a more resilient and sustainable landscape.

Learn how to:

- Build resiliency into permanent landscapes
- Improve infiltration of precipitation
- Increase moisture retention
- Break up hard pan and compaction
- Encourage soil building and reduce soil erosion from wind and water
- Witness key line design and seeding

Hands on workshops include:

- How to take a soil sample and where to send it
- Identify resource concerns
- Conduct water infiltration tests
- Aggregate stability test
- Soil compaction test
- Conduct transects to determine ground cover
- Plant composition and identification

Scan QR code or call 505-471-4711 to register by August 15, 2025

If you are an individual with a disability who is in need of an auxiliary aid or service to participate in the meeting, please contact Tom Dominguez by August 15, 2025 at 505-471-4711 or via email at tdomingu@nmsu.edu
